PROGRAM

Research
Creative studies undertaken on a systematic basis in order to increase the stock of knowledge.

Guest Lecture
A monthly discussion delivered by experts outside RDI to broaden RDI researchers' point of view.

Working Papers
A monthly preliminary scientific or technical paper based on RDI research.

Consultancy
Contribution and services to solve Society problems.

Internship and Visiting Scholar
An exchange of services for enriching the experience and knowledge between our organization and partners.

Team Buildings
Wide range of activities designed to improve team performance.

Training
Delivering specific knowledge, practical skills, and competencies needed for research through teaching or practical sessions.

PARTNERSHIP

60 Fellows in 20 Countries

GLOBAL THINK TANK
Jalan Imperial II No. 52 Bandung, West Java, Indonesia 40135

RESEARCH

Resilience Development Initiative has seven research clusters. These are designed to enable researchers to have better ideas exchange and explore emerging research areas and to work more effectively with other research organizations and the community. These research clusters cover our main interest in which teams of researchers from a wide range of disciplines collaborate to do research on scientific, social, economic, environmental, and cultural issues.

Disaster and Climate Resilience
Research cluster that focuses on disaster and climate risk reduction and recovery. This cluster is chaired by Dr. Saut Sagala.

Renewable Energy and Emission Reduction
Research cluster that focuses on renewable energy issues (biogas in rural areas, energy efficiency) and climate change mitigation. This cluster is chaired by Dr. Yudha Prambudia.

Tourism and Cultural Heritage
Research cluster that focuses on tourism studies and cultural heritage management. This cluster is chaired by Aya Krishna, MBA

Children, Social Welfare, and Health
Research cluster that focuses on children in risky environment, social welfare, gender issues, and public health. This cluster is chaired by Dr. Riela Prudi Diantara

Water and Waste Management
Research cluster that focuses on issues related to water management (water resources, floods, droughts) and waste management. This cluster chaired by Elisabeth Rianawati, M.Eng.

Infrastructure and Urban Governance
Research cluster that focuses on the assessments on urban infrastructures and governance studies. This cluster is chaired by Dr. Mangapul Nababan.

Finance and Business Management
Research cluster that focuses on assessments of finance and business management studies. This cluster is chaired by Wahyu T.M. Prakoso, M.Sc.

STATIONS

RDI has carried out a number of research projects continuously in several locations in Indonesia, among others:

CONSULTANCY

RDI consultancy is one of RDI commitment to bridge the gap between knowledge and practices of development resiliency. We support business, governments and other stakeholders with our experience in developing knowledge, networks, and research implementation. We connect them in our common goal to promote resiliency development.

RDI has given consultation services to many clients such as:

INTERNSHIP & VISITING SCHOLARS

RDI offers an opportunity and invites undergraduate students to be involved in various research works at RDI. Students involvement is on a part-time basis for a semester or shorter, generally two months, with one of RDI researchers in their area of specialties. The internships program allows the students to explore a career path and to get exposure to a specific research interest while building valuable research skills. Furthermore, RDI has hosted a number of interns from many institutions, such as:
